STATISTICS OF
STEAM RAILWAYS OF CANADA

FOR THE YEAR ENDED DECEMBER 31
1922

Published by authority of the Hon. Thomas A. Low, M.P.,
Minister of Trade and Commerce

OTTAWA
F. A. ACLAND
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY
1024

PREFACE

The report on the Statistics of Steam Railways of Canada is compiled in the Transportation Branch of the Bureau, from returns made by the railways of Canada, in accordance with the provisions of the Railway Act, 1919 (9-10 George V, Chapter 68) and the Statistics Act, 1918 (8-9 George V, Chapter 43), certified under oath as correct by the comptrollers or other officers of the companies concerned.

Certain improvements and elaborations have been made in the data on ties and rails laid in track. The data on accidents at highway crossings have also been extended to show accidents to pedestrians and to persons riding in automobiles and in other vehicles. With the increasing use of automobiles and the large number of automobile accidents this division of the data should be useful.

The statistics of electric railways have been printed as a separate report this year and may be had on application to the Bureau.

R. H. COATS,
Dominion Statistician.

DOMINION BUREAU OF STATISTICS TRANSPORTATION BRANCH

R. H. COATS, B.A., F.S.S., F.R.S.C., Dominion Statistician.
G. S. WRONG, B.Sc. Chief, Transportation Branch.

INTRODUCTION AND SUMMARY

The past three years have been difficult years for the Canadian railways. The year 1920 achieved a record in respect to revenues, resulting from a combination of fairly heavy traffic and high freight rates, but expenses were also high and net operating revenues, except for October and November, were small and for three months became deficits. Throughout 1921 both freight and passenger traffic were lighter than in 1920; however, increases in freight and passenger rates made in September 1920, increased revenues, whilst cuts in rates of wages in July 1921, and declines in prices of materials reduced operating expenses so that after February there was a continued increase in the net operating revenues. January and February, 1922, again showed operating deficits, but thereafter net revenues were earned, and with the enormous grain harvest, the volume of traffic handled by the railways reached a record and net revenues also increased. Freight rates were reduced July 6th by 20 to 25 per cent on grain and grain products, and on August 1st by about 6 per cent on basic commodities such as forest products, iron, building materials, etc., whilst all increases granted in 1920 on coal were removed. Despite these material reductions in rates, however, substantial net revenues were produced. The effect of cheaper materials was more fully felt than during 1921, the wholesale prices index number for 1921 showing a drop of 70.9 points from 1920, and for 1922 a further drop of 21.2 points. Certain reductions in rates of wages were made during the year, and a saving was also effected by the elimination of overtime and punitive rate schedules and by rearrangements of working conditions. These and other factors (increased traffic density being not the least) enabled the railways to keep the expenses on the whole below 1921 and well below 1920, and to show surpluses from operation.

The increases in traffic were more or less general, with grain, forest products and building materials predominating. Coal showed a falling off. The strikes of the railway shopmen on American railways caused some diversion of traffic over Canadian railways, and there was also a tendency, possibly due to the effect of the strikes, to draw Canadian freight cars into service on American roads. According to reports of the Railways Association of Canada covering

practically all roads in Canada, the excess of Canadian box cars on the United States roads over American box cars in Canadian roads was 10,193 on July 15; on October 1 when cars were needed for grain this had increased to 20,522, although by the close of the year it had been reduced to 17,262, whereas the greatest surplus of American coal cars on Canadian roads was 8,367, on November 1.

The strikes in union coal mines in the United States April to August greatly curtailed the imports of coal and threw additional burden on the railways to overcome the lack of storage piles throughout the country when their energies were required to move the harvest. Happily there were no strikes on Canadian railways, working conditions and wage schedules having been amicably arranged, and the grain was handled very expeditiously. This year over twelve and three quarter million bushels of grain moved westward and was exported from Vancouver.

During May, 1922, working conditions were rearranged, providing for payment of the ninth and tenth hour on a pro rata rate instead of punitive rate for maintenance of way employees. The pay of certain federated shop craft employees for holidays other than New Years, Labour Day and Christmas, was also rearranged on a straight time basis instead of on punitive rates. Straight time was applied to Sunday work under certain conditions. Somewhat similar arrangements were made in June with clerks, other office and station employees and labourers. During July rates of wages of maintenance of way employees were cut one to five cents per hour and in November these were increased one to three cents. In August federated craft employees wage rates were cut seven to nine cents per hour, and on November 1st clerks and certain other office and station employees' rates were reduced approximately one cent per hour. The changes were not uniform on all roads, but the above were the most important alterations. The net result of these adjustments was a reduction in the average hourly rate of pay for employees on all railways of 7 per cent. The cuts extended practically throughout all classes of employees, the largest cut being in the wages of section men of 15 per cent, while five classes showed slight increases. There was an average of 1,992 fewer employees or 1.2 per cent but the saving in wages was \$14,462,098 or 5.8 per cent compared with the previous year.

There were 495 miles of new line opened for operations during the year, 267 miles completed but not opened for traffic and 1,115 miles under construction. These are not net figures as there was considerable mileage shortened and lifted where conditions warranted the change.

The railways as a whole reduced the operating ratio for the year from 92.3 per cent in 1921 to 89.4 per cent, and increased the net operating revenues by \$11,332,035, by a reduction of operating expenses. Although over five million more tons of freight were carried and the ton miles increased by 14 per cent, through reductions in freight rates, freight revenues (rail and water line) showed a decline of \$4,020,214 or 2.5 per cent, and with reduced rates

and decline of 5 per cent in the number of passengers carried, passenger revenues fell off \$10,731,022 or 12 per cent, while total revenues decreased \$17,321,764 or 3·8 per cent. Revenues from demurrage declined from \$1,150,052 in 1921 and \$2,359,006 in 1920 to \$873,173. The demurrage rate was increased December 5th 1921 and evidently had the desired effect of preventing excessive delays to freight cars.

Operating expenses were reduced by \$28,653,799 or 6·5 per cent, maintenance of way and structures expenses being reduced \$8,380,790 and maintenance of equipment \$3,632,815, or a total of \$12,013,605 in maintenance while transportation expenses were cut \$18,574,625 in spite of the heavier freight traffic of 14 per cent and an increase of 3 per cent in train mileage.

The freight traffic density was 763,530 tons per mile of road for the year and although this was considerably better than during 1921, it was under 1920, 1918 and 1917. Average train loading, however, was 481 tons of revenue freight as against 447 tons for 1921 and 457 tons for 1920. The average freight receipts per ton mile which are governed by both rates and the relative quantities of low rate freight, was 1·039 cents. This was ·161 cents or 13·4 per cent less than for 1921 and was effected principally through the cuts in freight rates in July and August, the average per ton mile for December being only ·880 cents. The average receipts per ton mile reflect in a measure the freight rates and although the yearly average of 1·039 cents and the average at the close of the year of ·880 cent were above the yearly average of ·751 cent for 1915, operating expenses were greatly increased, coal costing \$6·40 per ton as against \$3·03 in 1915 and the average hourly rate of wages was doubled and other items of expenses, such as cost of ties, which jumped from 53·7 cents to 93·2 cents, also were correspondingly higher.

The number of persons killed in train accidents was the same as last year (323) and of these 62 were hit by trains while crossing the track in automobiles and 22 while riding in other vehicles. The number of persons injured increased to 3,256 the largest increase being in the number of trainmen injured which increased from 1,517 in 1921 to 1,849. Accidents other than train accidents also showed an increase in persons injured. The number of injuries to trackmen increased from 1,571 to 2,145 and to shopmen from 1,623 to 2,180 while the total increased from 4,644 last year to 5,991.

In July the Privy Council disallowed the appeal of holders of the preference and common stock of Grand Trunk Railway against the majority award of the arbitration board and in October the Grand Trunk, Grand Trunk Pacific, Canadian National and Canadian Government lines were placed under the management of one board of directors and a new president appointed over the combined system. This system now comprises 20,879 miles of road in Canada excluding electric lines and lines in the United States.

Although the Dominion Government was operating the Grand Trunk Railway throughout the year, the accounts were kept separate and are so shown in this report. The operating revenues and expenses pertain only to the Grand Trunk railway of Canada but the net revenues or loss of the lines in the United States are included in the income account, so that the income account is that of the entire Grand Trunk System. The data of the Canadian Pacific railway includes the Canadian Pacific lines in the United States and similarly the data of the Canadian Northern system includes all the steam lines of the system. The operating revenues, expenses, traffic data, etc. of the electric lines of the Canadian Northern System viz., Niagara St. Catharines and Toronto and the Toronto Suburban are shown in the report of Electric railways but the net revenues or loss is included in the income of the Canadian Northern system (steam railway).

Included with Dominion Aid is \$37,785,319.54 for lines built by the Government and handed over to the C.P.R., including \$6,639,581 for surveys; \$5,160,053 paid to the Quebec Government and from 1912, \$4,994,416 paid to Grand Trunk Pacific under the Implement Clause of the agreement, between the Government and the Company.

(d) This included \$10,000,000 loaned to the G.T.R. under authority chapter 19 of 1909.

(f) This reduction is due to the payment of a loan.

Dans les subsides du gouvernement fédéral sont compris \$37,785,319.54, coût de lignes construites par le gouvernement et rétrocédées au C.P.R.; sont également comprises les dépenses suivantes:—\$6,639,581 pour arpentage, \$5,160,053 versés à la province de Québec et, depuis 1912, \$4,994,416 payés au Grand-Tronc-Pacifique en vertu de la clause dite du «matériel», de la convention intervenue entre le gouvernement et cette compagnie.

(d) Y compris \$10,000,000 prêtés au Grand-Tronc-Pacifique en vertu de la loi de 1909, chap. 19.

(f) Cette réduction est attribuable au remboursement d'un prêt.

STATISTIQUE DES
CHEMINS DE FER DU CANADA

POUR L'ANNÉE TERMINÉE LE 31 DÉCEMBRE

1922

Publié par ordre de l'honorable Thomas A. Low, M.P.,
Ministre du Commerce

OTTAWA
F. A. ACLAND
IMPRIMEUR DE SA TRÈS EXCELLENTE MAJESTÉ LE ROI
1923

PRÉFACE

La statistique des chemins de fer est compilée par la Section des Transports du Bureau Fédéral de la Statistique, au moyen des données que contiennent les rapports officiels faits par les compagnies de chemins de fer du Canada, conformément aux dispositions de la Loi des chemins de fer de 1919 (George V, chapitre 68 et de la Loi de la Statistique de 1918 (8-9 George V, chapitre 43), l'exactitude desquels rapports est affirmée sous serment par les contrôleurs ou autres fonctionnaires des différentes compagnies.

Certaines améliorations et additions ont été faites cette année à cet ouvrage, notamment en ce qui concerne la pose des traverses et des rails; les données relatives aux accidents aux passages à niveau ont été également amplifiées, de manière à établir une distinction entre les piétons d'une part, et les personnes circulant en automobile ou dans d'autres véhicules, d'autre part. Le nombre constamment croissant des automobiles en circulation et des accidents où elles figurent, donne à ces détails une utilité incontestable.

La statistique des tramways électriques a fait, cette année, l'objet d'un rapport spécial, que l'on peut se procurer en en faisant la demande au Bureau.

R. H. COATS,

Statisticien du Dominion.

BUREAU FÉDÉRAL DE LA STATISTIQUE,
OTTAWA, 21 août 1923.

R. H. Coats, B.A., F.S.S., F.R.S.C. Statisticien du Dominion

G. S. Wrong, B.Sc., Chef, Sections des Transports

INTRODUCTION ET RÉSUMÉ

Les chemins de fer canadiens ont été rudement éprouvés pendant les trois dernières années. L'année 1920, qui vit un trafic très considérable et des tarifs exceptionnellement élevés, accumula un chiffre de recettes qui n'avait encore jamais été atteint, mais les frais d'exploitation étaient également élevés, si bien que les recettes nettes d'exploitation, à l'exclusion des mois d'octobre et de novembre, furent minimales et accusèrent même un déficit pendant trois mois. En 1921, la circulation des voyageurs et les transports de marchandises furent inférieurs à 1920; toutefois, l'augmentation des tarifs, qui eut lieu en septembre 1920, et qui frappa tout à la fois les voyageurs et les marchandises, contribua à l'accroissement des recettes; d'autre part, la réduction des salaires, opérée en juillet 1921, et la baisse des cours des matériaux réduisirent les dépenses d'exploitation, de telle sorte qu'après le mois de février, on put constater une augmentation constante des recettes nettes d'exploitation. En janvier et février 1922, les déficits reparurent, mais ensuite, l'ère des bénéfices se montra de nouveau; l'énorme récolte de grain eut pour effet d'augmenter le volume du trafic des chemins de fer, en même temps que leurs revenus. Le 6 juillet, les taux de transport furent réduits de 20 à 25 pour cent sur le grain, les farines et issues de meunerie et, le premier août, une nouvelle diminution d'environ 6 pour cent s'appliquait aux matières premières, telles que produits forestiers, fer, matériaux de construction, etc.; enfin, toutes les augmentations qui avaient frappé le charbon en 1920, étaient supprimées. Nonobstant ces réductions sensibles des tarifs, les chemins de fer réalisèrent des recettes nettes substantielles. L'effet de la baisse des matériaux se faisait sentir plus fortement qu'en 1921, le nombre indice des prix de gros en 1921 accusant une baisse de 70.9 points depuis 1920 et pour 1922 une nouvelle baisse de 21.2 points. Certaines réductions de salaires furent effectuées pendant l'année, en même temps qu'on réalisait des économies par l'élimination du tarif spécial, du travail des jours fériés et par la réorganisation des conditions du travail. Ces facteurs et d'autres encore, notamment la densité accrue du trafic, permirent aux compagnies de chemins de fer de maintenir leurs dépenses au-dessous de celles de 1921 et de 1920 et de réaliser un surplus dans l'exploitation.

L'accroissement du trafic était surtout attribuable à l'augmentation du volume du grain, des produits forestiers, des matériaux de construction, etc.; par contre, le charbon était en baisse. Les grèves des ouvriers des ateliers des compagnies de chemins de fer américains causèrent une certaine diversion

du trafic en faveur des réseaux canadiens; on constata également une tendance peut-être due aux effets de la grève, à attirer les wagons de marchandises canadiens sur les voies américaines. D'après les rapports de l'Association des chemins de fer du Canada, qui embrasse presque tous les réseaux canadiens, on comptait, au 15 juillet, 10,913 fourgons à marchandises canadiens sur les voies américaines de plus qu'il n'y avait de voitures américaines de même espèce sur les voies canadiennes; à la date du premier octobre, lorsque ces wagons étaient nécessaires pour le transport du grain, on constatait un déficit de 20,522 unités, ce nombre étant toutefois réduit à 17,262 à la fin de l'année. Par contre, les wagons américains servant au transport du charbon étaient au nombre de 8,367 sur les voies canadiennes au premier novembre.

Les grèves qui régnèrent dans les charbonnages des Etats-Unis, du mois d'avril au mois d'août, réduisirent considérablement les importations de charbon et obligèrent les compagnies de chemins de fer à faire un très grand effort pour la reconstitution de nos stocks de charbon, au moment où elles avaient à faire face au transport de notre récolte de blé. Fort heureusement, il n'y eut point de grèves dans les chemins de fer canadiens, les taux des salaires et les conditions du travail ayant été fixés à l'amiable, si bien que le grain fut expédié très rapidement. Cette année-là, plus de 12,750,000 boisseaux de grain furent emportés vers l'ouest et exportés de Vancouver.

En mai 1922 fut établie une nouvelle charte du travail, par laquelle il est stipulé que les neuvième et dixième heures de travail du personnel des voies seraient payées au prorata du tarif normal, au lieu du tarif extraordinaire qui leur était jusqu'alors appliqué. La rémunération de certains corps de métier travaillant aux ateliers, pour les jours de fête autres que le premier janvier, la Fête du Travail et Noël fut également réajustée, ces journées étant payées au tarif normal, au lieu du tarif extraordinaire. A certains égards, le travail dominical était assimilé au travail quotidien. Des arrangements d'une nature similaire furent conclus en juin, avec les commis, employés de bureau, employés des gares et stations et journaliers. En juillet, le tarif des salaires du personnel des voies subit une baisse de un à cinq centins par heure, mais en novembre, il fut élevé de un à trois centins. En août, le taux des salaires des ouvriers syndiqués fut abaissé de 7 à 9 centins par heure. Enfin, à partir du premier novembre, la rémunération des commis et de certains employés des bureaux et des stations subit une réduction d'approximativement un centin par heure. Ces changements ne furent pas absolument uniformes dans tous les réseaux, mais ce qui vient d'être dit résume les changements les plus importants. Le résultat net de ces mesures fut une réduction de la rémunération de l'ensemble du personnel de tous les chemins de fer de 7 pour cent en moyenne. Presque toutes les catégories d'employés et ouvriers en subirent les conséquences, ceux qui furent le plus lourdement atteints étant les poseurs, qui subirent une perte de 15 pour cent; par contre, cinq catégories reçurent de légères augmentations. D'autre part, on compta 1992 employés et ouvriers de moins que l'année précédente, soit 1.2 pour cent, mais l'économie réalisée sur les salaires s'éleva à \$14,462,098, soit 5.8 pour cent de moins que l'année précédente.

Pendant l'année, 495 milles de voies nouvelles furent ouvertes à l'exploitation, 267 milles de voies nouvelles furent achevés, mais non livrés au trafic et 1,115 milles étaient en cours de construction. Ces chiffres ne constituent pas des additions nettes, car une longueur considérable de voie fut supprimée et les rails enlevés.

Tous les réseaux, considérés ensemble, réduisirent à 89.4 pour cent le pourcentage des dépenses aux recettes d'exploitation, au lieu de 92.3 pour cent en 1921; cette réduction des frais d'exploitation porta les recettes nettes de l'exploitation à \$11,332,035. Quoique le transport des marchandises se soit accru de plus de cinq millions de tonnes, et que les tonnes-milles aient augmenté de 14 pour cent, la diminution des tarifs de transport, tant par rail que par eau, causa une baisse des recettes de \$4,020,214 ou 2.5 pour cent; d'autre part, le nombre des voyageurs ayant décliné en même temps que le tarif des voyages était abaissé, les recettes provenant du transport des voyageurs diminuèrent de \$10,731,022, soit 12 pour cent. Au total, les recettes décururent de \$17,321,764 ou 3.8 pour cent. Les recettes découlant de la surestarie ne donnèrent plus que \$873,173, au lieu de \$1,150,052 en 1921 et \$2,359,006 en 1920. Les tarifs de surestarie furent relevés le 5 décembre 1921, mesure qui produisit l'effet désiré de faire décharger plus vite les wagons pleins.

Les dépenses d'exploitation furent réduites de \$28,653,799 ou 6.5 pour cent, l'entretien des voies et ouvrages concourant à cette réduction pour \$8,380,790 et l'entretien du matériel pour \$3,632,815, soit au total \$12,013,605 pour l'entretien et les réparations; d'autre part, les frais de traction subirent une réduction de \$18,574,625, nonobstant l'accroissement du trafic égal à 14 pour cent et une augmentation de 3 pour cent du total des distances parcourues par les trains.

La densité du trafic des marchandises fut de 763,530 tonnes par mille de voie, pendant l'année; quoique sensiblement meilleur que celui de 1921, ce chiffre est néanmoins inférieur à ceux de 1920, 1918 et 1917. La moyenne de charge d'un train fut égale à 481 tonnes de marchandises payantes, au lieu de 447 tonnes en 1921 et 457 tonnes en 1920. La moyenne des recettes (marchandises) par tonne-mille, qui procède tout à la fois du tarif et du volume relatif des marchandises transportées à bas prix atteignit 1.039 centins, c'est-à-dire .161 centins ou 13.4 pour cent de moins qu'en 1921; cette diminution résulte principalement des réductions opérées dans les tarifs de transport des marchandises, en juillet et août, la moyenne par tonne-mille, pour le mois de décembre, étant tombée à .880 centins. La moyenne des recettes par tonne-mille reflète dans une certaine mesure les tarifs de fret et quoique la moyenne annuelle de 1.039 centins et la moyenne de fin d'année de .880 centin dépassèrent la moyenne annuelle de 1915, qui était de .751 centin, les frais d'exploitation furent considérablement accrus, le charbon coûtant \$6.40 par tonne au lieu de \$3.03 en 1915; la moyenne des salaires par heure étant doublée et certaines autres dépenses, telles que le coût des traverses, qui passa de 53.7 centins à 93.2 centins, ayant également subi une forte augmentation.

Le nombre des personnes tuées par les trains fut le même que l'an dernier, 323, dont 62 tuées en automobile aux passages à niveau et 22 tuées au même endroit dans des voitures hippomobiles. Le nombre des blessés atteignit 3,256; l'augmentation la plus considérable frappait le personnel des trains, ces victimes étant au nombre de 1,849 au lieu de 1,517 en 1921. Le nombre des accidents autres que ceux causés par les trains s'est également accru. Les employés des voies blessés furent au nombre de 2,145, au lieu de 1,571 et les ouvriers des ateliers, de 2,180 au lieu de 1,723; bref, tous ces accidents formaient un total de 5,991, comparativement à 4,644 l'an dernier.

Au mois de juillet, le Conseil Privé rejeta l'appel interjeté par les actionnaires (actions ordinaires et actions privilégiées) du Grand Tronc, contre la sentence arbitrale; en octobre, le Grand Tronc, le Grand Tronc Pacifique, le Canadien National et les autres lignes du gouvernement canadien furent placées sous la gestion d'un unique conseil de direction et un nouveau président fut nommé pour l'ensemble du réseau de l'Etat. Ce réseau embrasse maintenant 20,879 milles de voies au Canada, à l'exclusion des lignes électriques et des voies situées aux Etats-Unis.

Quoique le chemin de fer du Grand Tronc ait été exploité par l'Etat pendant l'année, ses comptes ont été tenus séparément, ainsi qu'on le verra dans ce rapport. Les recettes et les dépenses d'exploitation s'appliquent exclusivement à la partie du chemin de fer du Grand Tronc située au Canada, mais les revenus nets ou le déficit net des lignes situées aux Etats-Unis figurent au bilan, lequel reflète l'ensemble du réseau du Grand Tronc. Les données se rapportant au chemin de fer Canadien du Pacifique embrassent les voies de ce réseau situées aux Etats-Unis; enfin, le réseau du Canadian Northern comprend la totalité des voies du réseau, mais non les lignes électriques. Les recettes et dépenses d'exploitation, les données du trafic, etc., des lignes électriques du réseau du Canadian Northern, savoir: Niagara, St-Catharines et Toronto, et the Toronto Suburban se trouvent dans le rapport sur les tramways électriques, mais les revenus nets ou déficits nets se trouvent dans le bilan du réseau du Canadian Northern (chemin de fer à vapeur.)
